Site Name: Water Gulch Dam and Stream Crossing

Stream Name: Freathy Creek (Water Gulch)

Structure Owner:

Year Remediated: 2012

Site Type: Dam

Site Status After Remediation: Remediated, fish response unconfirmed

Species Benefited After Remediation: Unknown

Immediate Downstream barrier PAD ID: [757999](#)

PAD ID: [757998](#)

Tributary To: Chamberlain Creek

Barrier Remediation By: Unknown

Barrier Description Prior to Remediation: Temporal

Count of Barriers Downstream: 1

Count of Barriers Upstream: 2

Distance Upstream to Next Barrier or Limit of Anadromy : 0.03666 Miles

*Site statistics based on June 2015 version of the Passage Assessment Database

Notes: Sill was removed, and approximately 70 tons of concrete was broken into manageable sized pieces, removed from the crossing and exported to a concrete recycling facility in Willits, California. Before: Temporal barrier per professional judgment by Mendocino Land Trust, Inc. 12 ft tall concrete dam constructed in the late 1950's originally to create a summertime swimming hole, discontinued in the early 1990's. Currently, the dam is a barrier to all juvenile upstream movement.
