

2014-2015 Fisheries Restoration Grant Program: Forest Land Proposals – Funded List

Project Type	Project Number	Project Name	Applicant	Project Description	County	CDFW Region	Recommended Amount
HI	F022	Campbell Creek Instream Coho Salmon Habitat Enhancement Project	Trout Unlimited	Install at least 100 pieces of large wood at 50 sites along 2.34 miles of high priority core recovery coho habitat in Campbell Creek. Project will increase stream complexity, pool frequency, winter shelter and rearing habitat for coho salmon.	Mendocino	1	\$42,840
HU	F010	James Creek Road Decommissioning and Fish Passage Implementation Project	Mendocino Land Trust	Project will address CDFW recovery priorities in the James Creek basin by decommissioning 5.2 miles of riparian and upslope roads and eliminating the #1 fish barrier on JDSF lands as identified by Ross Taylor, allowing upstream access to 2.8 miles.	Mendocino	1	\$91,193
HI	F006	John Smith Creek Coho Habitat Enhancement Project	Mendocino County Resource Conservation District	To improve coho salmon habitat, with legacy forest land-use impacts, by installing 47 pieces of large wood which will add complexity, provide cover, sort gravel and enhance/create pools at 11 sites along a 1.25 mile stream reach.	Mendocino	1	\$49,245
HU	F011	Big River Road M14 Watercourse Restoration & Road to Trail Conversion	California Department of Parks and Recreation	The objectives of this project are to remove 18 culverted watercourse crossings along M14, convert the road to a trail, and recontour the lower-most segments of three spur roads and an adjacent section of Road M11.	Mendocino	1	\$289,859
HU	F005	Scott River Mile 21 Road Crossing Repair	Siskiyou Resource Conservation District	Reduce legacy forest impacts by repairing failed road crossings that contribute ongoing sediment loads to Scott River watershed.	Siskiyou	1	\$29,334
Total							\$502,471
