## Site Overview

Photos are representative of the Central Coast Region and may not be within this MPA.

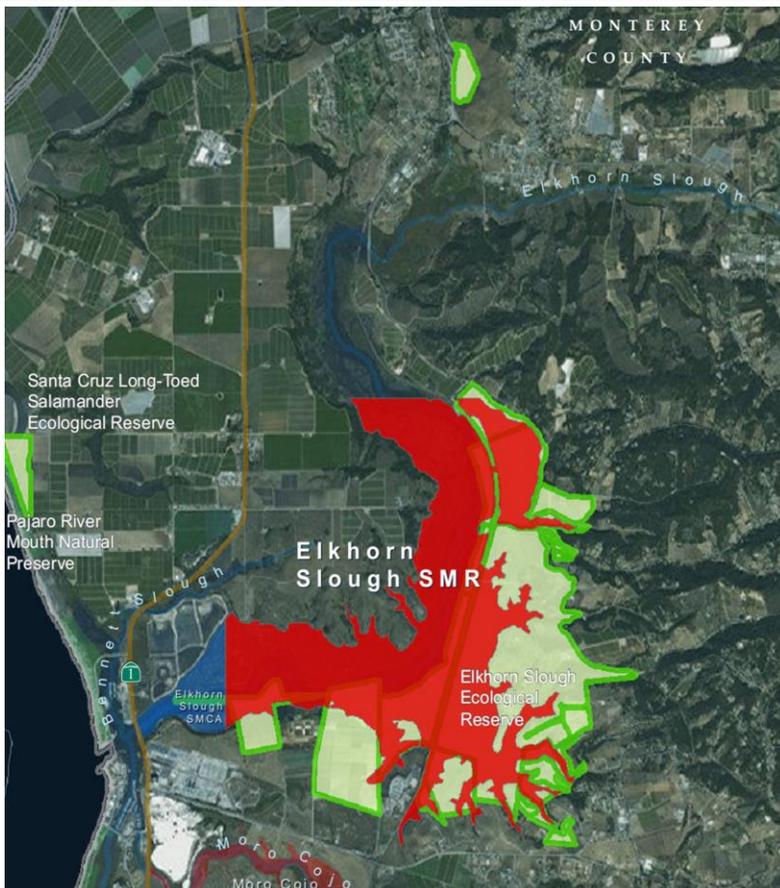

### What is an MPA?

MPAs are a type of [marine managed area](#) (MMA) where marine or estuarine waters are set aside primarily to protect or conserve marine life and associated habitats. California has a coastal network of 124 protected areas designed to help increase the coherence and effectiveness of protecting the state's marine life, habitats, and ecosystems. The network includes three types of MPA: [state marine reserve](#) (SMR), [state marine conservation area](#) (SMCA), and [state marine park](#) (SMP); one MMA: [state marine recreational management area](#) (SMRMA); and [special closures](#). There are 119 MPAs, 5 MMAs and 15 special closures, each with unique boundaries and regulations in the network. Non-consumptive activities, restoration, and permitted scientific research are allowed.

### What is an SMR?

An **SMR** is a type of MPA that protects resources by prohibiting the recreational and/or commercial take of all marine resources. (Area restrictions are defined in [Title 14, Section 632\(a\)\(1\)\(A\)](#)).

### Where is Elkhorn Slough SMR?

### Elkhorn Slough SMR Overview

- **MPA size:** 2.72 square miles
- **Depth range:** 0 to 10 feet
- **Along-shore span (shoreline):** 4.4 miles

### Elkhorn Slough SMR Key Habitats

- **Tidal flats:** 10.34 miles
- **Coastal marsh:** 10.34 miles
- **Eelgrass:** 0.03 square miles
- **Estuary:** 1.65 square miles
- **Marsh:** 1.43 square miles
- **Unidentified (all depths):** 1.47 square miles

### Boundaries and Regulations

**Boundary:** This area includes the waters below mean high tide within Elkhorn Slough lying east of longitude 121° 46.400' W. and south of latitude 36° 50.500' N.

**All take is prohibited in Elkhorn Slough SMR.**

## How and Why Elkhorn Slough was Chosen for an SMR

MPAs were designed through a collaborative, regional public process by a cross-interest regional stakeholder group (RSG). Using scientific criteria, public input and local resource knowledge the RSG developed MPA proposals. Proposals included specific objectives (why the site should be an MPA-*included below*), the classification (type of MPA), boundaries, and regulations. Final MPA proposals were sent to the California Fish and Game Commission (Commission) for their adoption process. Elkhorn Slough SMR was adopted by the Commission in 2007.

### **Summary of Objectives for Elkhorn Slough SMR:**

Continue to provide complete protection for one of the few estuarine areas of the central coast and expand this protection to include the entire slough channel as opposed to one half of the channel as is presently included.

## Species Likely to Benefit from the Establishment of MPAs in California

Species likely to benefit from establishing an MPA are those, whose home range, behavior, reproduction, exploitation rate or population status indicates that they may benefit from spatial management. This includes species that are directly targeted by fisheries, those which are caught incidental to fishing for the target species (bycatch) and which cannot be returned to the water with a high rate of survival, and those which may be indirectly impacted through ecological changes within MPAs.

For a list of species likely to benefit from MPAs statewide: [www.dfg.ca.gov/marine/mpa/species.asp](http://www.dfg.ca.gov/marine/mpa/species.asp)
