

Lovers Point-Julia Platt State Marine Reserve

Central California Marine Protected Areas (MPAs), *Established September 2007*

Site Overview

Photos are representative of the Central Coast Region and may not be within this MPA.

What is an MPA?

MPAs are a type of [marine managed area](#) (MMA) where marine or estuarine waters are set aside primarily to protect or conserve marine life and associated habitats. California has a coastal network of 124 protected areas designed to help increase the coherence and effectiveness of protecting the state's marine life, habitats, and ecosystems. The network includes three types of MPA: [state marine reserve](#) (SMR), [state marine conservation area](#) (SMCA), and [state marine park](#) (SMP); one MMA: [state marine recreational management area](#) (SMRMA); and [special closures](#). There are 119 MPAs, 5 MMAs and 15 special closures, each with unique boundaries and regulations in the network. Non-consumptive activities, restoration, and permitted scientific research are allowed.

What is an SMR?

An **SMR** is a type of MPA that protects resources by prohibiting the recreational and/or commercial take of all marine resources. (Area restrictions are defined in [Title 14, Section 632\(a\)\(1\)\(A\)](#)).

Lovers Point-Julia Platt SMR Overview

- **MPA size:** 0.3 square miles
- **Depth range:** 0 to 88 feet
- **Along-shore span (shoreline):** 1.0 miles

Where is Lovers Point-Julia Platt SMR?

Lovers Point-Julia Platt SMR Key Habitats

- **Beaches:** 0.45 miles
- **Rocky shores:** 1.39 miles
- **Surfgrass:** 1.14 miles
- **Sand (all depths):** 0.12 square miles
- **Rock (all depths):** 0.08 square miles
- **Average kelp (1989 to 2008):** 0.07 square miles
- **Unidentified (all depths):** 0.09 square miles

Boundaries and Regulations

Boundary: This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

- 36° 37.100' N. lat. 121° 54.093' W. long.;
- 36° 37.250' N. lat. 121° 53.780' W. long.;
- 36° 37.380' N. lat. 121° 53.850' W. long.;
- 36° 37.600' N. lat. 121° 54.750' W. long.; and
- 36° 37.600' N. lat. 121° 54.919' W. long.

All take is prohibited in Lovers Point-Julia Platt SMR.

Lovers Point-Julia Platt State Marine Reserve

How and Why Lovers Point-Julia Platt was Chosen for an SMR

MPAs were designed through a collaborative, regional public process by a cross-interest regional stakeholder group (RSG). Using scientific criteria, public input and local resource knowledge the RSG developed MPA proposals. Proposals included specific objectives (why the site should be an MPA-*included below*), the classification (type of MPA), boundaries, and regulations. Final MPA proposals were sent to the California Fish and Game Commission (Commission) for their adoption process. Lovers Point-Julia Platt SMR was adopted by the Commission in 2007.

Summary of Objectives for Lovers Point-Julia Platt SMR:

Provide for increased protection through the expansion of an existing state marine reserve in shallow hard and soft bottom habitats in an area close to population centers and used by non-consumptive divers. The primary goal of this MPA will be to provide for recreational non-consumptive uses in an area minimally impacted by human take. Additionally this increases the area adjacent to an existing research institution which can facilitate research and monitoring within the MPA.

Species Likely to Benefit from the Establishment of MPAs in California

Species likely to benefit from establishing an MPA are those, whose home range, behavior, reproduction, exploitation rate or population status indicates that they may benefit from spatial management. This includes species that are directly targeted by fisheries, those which are caught incidental to fishing for the target species (bycatch) and which cannot be returned to the water with a high rate of survival, and those which may be indirectly impacted through ecological changes within MPAs.
