## Site Overview

Photos are representative of the Central Coast Region and may not be within this MPA.

### What is an MPA?

MPAs are a type of [marine managed area](#) (MMA) where marine or estuarine waters are set aside primarily to protect or conserve marine life and associated habitats. California has a coastal network of 124 protected areas designed to help increase the coherence and effectiveness of protecting the state's marine life, habitats, and ecosystems. The network includes three types of MPA: [state marine reserve](#) (SMR), [state marine conservation area](#) (SMCA), and [state marine park](#) (SMP); one MMA: [state marine recreational management area](#) (SMRMA); and [special closures](#). There are 119 MPAs, 5 MMAs and 15 special closures, each with unique boundaries and regulations in the network. Non-consumptive activities, restoration, and permitted scientific research are allowed.

### What is an SMR?

An **SMR** is a type of MPA that protects resources by prohibiting the recreational and/or commercial take of all marine resources. (Area restrictions are defined in [Title 14, Section 632\(a\)\(1\)\(A\)](#)).

### Where is Morro Bay SMR?

### Morro Bay SMR Overview & Key Habitats

- **MPA size:** 0.88 square miles
- **Depth range:** 0 to 10 feet
- **Along-shore span (shoreline):** 1.4 miles
- **Tidal flats:** 1.53 miles
- **Coastal marsh:** 4.46 miles
- **Marsh:** 0.65 square miles
- **Estuary:** 0.83 square miles
- **Unidentified (all depths):** 0.02 square miles

### Boundaries and Regulations

**Boundary:** This area includes the area below mean high tide line within Morro Bay east of longitude 120° 50.340' W.

**All take is prohibited in Morro Bay SMR.**

# Morro Bay State Marine Reserve

## How and Why Morro Bay was Chosen for a SMR

MPAs were designed through a collaborative, regional public process by a cross-interest regional stakeholder group (RSG). Using scientific criteria, public input and local resource knowledge the RSG developed MPA proposals. Proposals included specific objectives (why the site should be an MPA-*included below*), the classification (type of MPA), boundaries, and regulations. Final MPA proposals were sent to the California Fish and Game Commission (Commission) for their adoption process. Morro Bay SMR was adopted by the Commission in 2007.

### **Summary of Objectives for Morro Bay SMR:**

Provide for complete protection in a portion of one of the few estuarine areas of the central coast. This area is within an existing State Park lease where current Park rules prohibit take of living resources.

## Species Likely to Benefit from the Establishment of MPAs in California

Species likely to benefit from establishing an MPA are those, whose home range, behavior, reproduction, exploitation rate or population status indicates that they may benefit from spatial management. This includes species that are directly targeted by fisheries, those which are caught incidental to fishing for the target species (bycatch) and which cannot be returned to the water with a high rate of survival, and those which may be indirectly impacted through ecological changes within MPAs.

For a list of species likely to benefit from MPAs statewide: [www.dfg.ca.gov/marine/mpa/species.asp](http://www.dfg.ca.gov/marine/mpa/species.asp)

For a list of species likely to benefit from central coast MPAs: [www.dfg.ca.gov/marine/pdfs/binder3b.pdf](http://www.dfg.ca.gov/marine/pdfs/binder3b.pdf)
