## Site Overview

Photos are representative of the South Coast Region and may not be within this MPA.

## What is an MPA?

MPAs are a type of [marine managed area](#) (MMA) where marine or estuarine waters are set aside primarily to protect or conserve marine life and associated habitats. California has a coastal network of 124 protected areas designed to help increase the coherence and effectiveness of protecting the state's marine life, habitats, and ecosystems. The network includes three types of MPA: [state marine reserve](#) (SMR), [state marine conservation area](#) (SMCA), and [state marine park](#) (SMP); one MMA: [state marine recreational management area](#) (SMRMA); and [special closures](#). There are 119 MPAs, 5 MMAs and 15 special closures, each with unique boundaries and regulations in the network. Non-consumptive activities, restoration, and permitted scientific research are allowed.

## What is an SMCA?

An **SMCA** is a type of MPA that protects resources by allowing for only specific types of recreational and/or commercial take to occur. (Area restrictions are defined in [Title 14, Section 632\(a\)\(1\)\(C\)](#)).

## Point Dume SMCA Key Habitats and Overview

- **MPA size:** 15.92 square miles
- **Depth range:** 0 to 2023 feet
- **Along-shore span (shoreline):** 2.9 miles
- **Beaches:** 4.09 miles
- **Rocky shores:** 0.44 miles
- **Surfgrass:** 0.7 miles
- **Sand (all depths):** 15.15 square miles
- **Rock (all depths):** 0.29 square miles
- **Average kelp (1989 to 2008):** 0.05 square miles
- **Unidentified (all depths):** 0.41 square miles
- **Submarine canyon (all depths):** 0.19 square miles

## Boundaries and Regulations

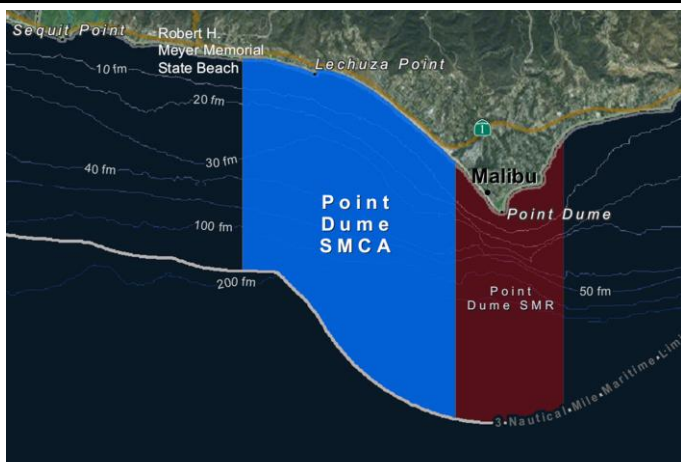

**Boundary:** This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

34° 02.306' N. lat. 118° 53.000' W. long.;  
33° 59.140' N. lat. 118° 53.000' W. long.; thence  
southeastward along the three nautical mile  
offshore boundary to  
33° 56.960' N. lat. 118° 49.200' W. long.; and  
34° 00.780' N. lat. 118° 49.200' W. long.

**Only the following take is allowed in Point Dume SMCA:**

1. The recreational take by spearfishing of white seabass and [pelagic finfish](#).
2. The commercial take of swordfish by harpoon; and [coastal pelagic species](#) by round haul net, brail gear, and light boat is allowed. Not more than five percent by weight of any commercial coastal pelagic species catch landed or possessed shall be other incidentally taken species.
3. Take pursuant to beach nourishment and other sediment management activities is allowed inside the conservation area pursuant to any required federal, state and local permits, or as otherwise authorized by the department.

## Where is Point Dume SMCA?

# Point Dume State Marine Conservation Area

## How and Why Point Dume was Chosen for an SMCA

MPAs were designed through a collaborative, regional public process by a cross-interest regional stakeholder group (RSG). Using scientific criteria, public input and local resource knowledge the RSG developed MPA proposals. RSG proposals included site specific rationale (why the site should be an MPA-*included below*), the classification (type of MPA), boundaries, and regulations. Final MPA proposals were sent to the California Fish and Game Commission (Commission) for their adoption process. Point Dume SMCA was adopted by the Commission in 2012.

### **South Coast RSG Identified Rationale for Point Dume SMCA:**

To protect habitat and species diversity. This SMR represents and protects a wide diversity of habitat types including eelgrass, surfgrass, kelp, rocky reefs, shallow subtidal, rocky intertidal, oil seeps, sand, and the estuarine inputs of Devereux Slough.

## Species Likely to Benefit from the Establishment of MPAs in California

Species likely to benefit from establishing an MPA are those, whose home range, behavior, reproduction, exploitation rate or population status indicates that they may benefit from spatial management. This includes species that are directly targeted by fisheries, those which are caught incidental to fishing for the target species (bycatch) and which cannot be returned to the water with a high rate of survival, and those which may be indirectly impacted through ecological changes within MPAs.

For a list of species likely to benefit from MPAs statewide: [www.dfg.ca.gov/marine/mpa/species.asp](http://www.dfg.ca.gov/marine/mpa/species.asp)
