

# Laguna Beach State Marine Reserve

Southern California Marine Protected Areas (MPAs), *Established January 2012*

## Site Overview

Photos are representative of the South Coast Region and may not be within this MPA.

### What is an MPA?

MPAs are a type of [marine managed area](#) (MMA) where marine or estuarine waters are set aside primarily to protect or conserve marine life and associated habitats. California has a coastal network of 124 protected areas designed to help increase the coherence and effectiveness of protecting the state's marine life, habitats, and ecosystems. The network includes three types of MPA: [state marine reserve](#) (SMR), [state marine conservation area](#) (SMCA), and [state marine park](#) (SMP); one MMA: [state marine recreational management area](#) (SMRMA); and [special closures](#). There are 119 MPAs, 5 MMAs and 15 special closures, each with unique boundaries and regulations in the network. Non-consumptive activities, restoration, and permitted scientific research are allowed.

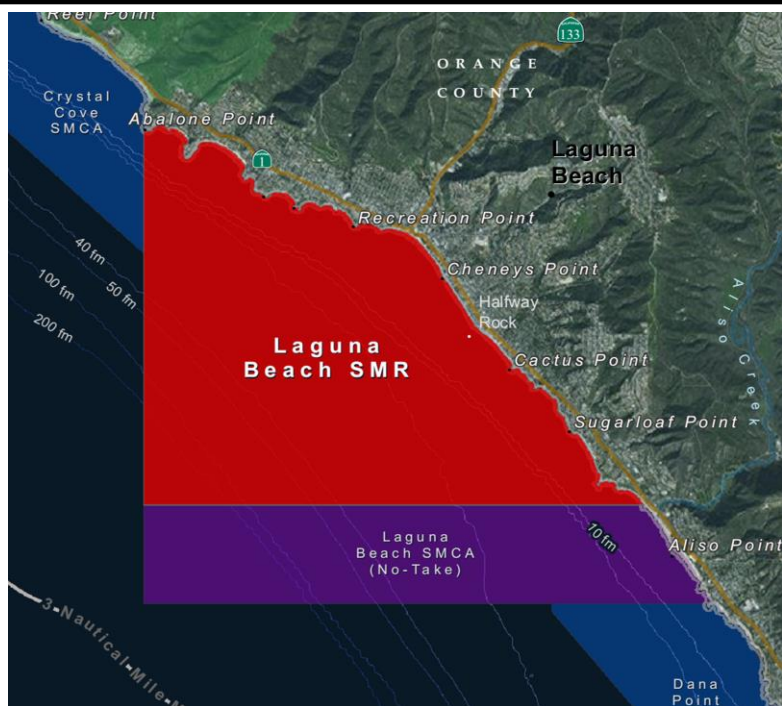

### What is an SMR?

An **SMR** is a type of MPA that protects resources by prohibiting the recreational and/or commercial take of all marine resources. (*Area restrictions are defined in [Title 14, Section 632\(a\)\(1\)\(A\)](#)*).

### Laguna Beach SMR Overview

- **MPA size:** 6.33 square miles
- **Depth range:** 0 to 1211 feet
- **Along-shore span (shoreline):** 5.2 miles

### Where is Laguna Beach SMR?

### Laguna Beach SMR Key Habitats

- **Beaches:** 3.31 miles
- **Rocky shores:** 2.46 miles
- **Surfgrass:** 2.43 miles
- **Sand (all depths):** 5.56 square miles
- **Rock (all depths):** 0.23 square miles
- **Average kelp (1989 to 2008):** 0.01 square miles
- **Unidentified (all depths):** 0.46 square miles

### Boundaries and Regulations

**Boundary:** This area is bounded by the mean high tide line and straight lines connecting the following points in the order listed:

33° 33.224' N. lat. 117° 49.184' W. long.;  
33° 33.211' N. lat. 117° 49.200' W. long.;  
33° 30.713' N. lat. 117° 49.200' W. long.; and  
33° 30.713' N. lat. 117° 45.264' W. long.

**All take is prohibited in Laguna Beach SMR.**

# Laguna Beach State Marine Reserve

## How and Why Laguna Beach was Chosen for an SMR

MPAs were designed through a collaborative, regional public process by a cross-interest regional stakeholder group (RSG). Using scientific criteria, public input and local resource knowledge the RSG developed MPA proposals. Proposals included site specific rationale (why the site should be an MPA-*included below*), the classification (type of MPA), boundaries, and regulations. Final MPA proposals were sent to the California Fish and Game Commission (Commission) for their adoption process. Laguna Beach SMR was adopted by the Commission in 2012.

### **South Coast RSG Identified Rationale for Laguna Beach SMR:**

This will serve as a backbone regional SMR for ecologically important size and spacing linkages. The reserve includes a good representation of variety of rocky and sandy habitats, including diverse rocky intertidal, shallow kelp reefs. This reserve captures maximum kelp, providing connectivity between PV and Point Loma to achieve Science Advisory Team guidelines.

## Species Likely to Benefit from the Establishment of MPAs in California

Species likely to benefit from establishing an MPA are those, whose home range, behavior, reproduction, exploitation rate or population status indicates that they may benefit from spatial management. This includes species that are directly targeted by fisheries, those which are caught incidental to fishing for the target species (bycatch) and which cannot be returned to the water with a high rate of survival, and those which may be indirectly impacted through ecological changes within MPAs.

For a list of species likely to benefit from MPAs statewide: [www.dfg.ca.gov/marine/mpa/species.asp](http://www.dfg.ca.gov/marine/mpa/species.asp)
