Application 15929 Permit 11037

DEC 5 '57

Department of Fish and Game
722 Capitol Avenue
Sacramento, California

Gentlemen:

You are hereby informed that the State Water Rights Board has under date of NOV 20 1957 issued to E. W. Little a permit to appropriate 6.25 cubic feet per second of the waters of Whaler Creek in El Dorado County for use for power purposes.

This permit is issued pursuant to an application which states that it is for a permit to appropriate "unappropriated waters of the State of California, subject to existing rights," and the permit states that it is expressly issued "subject to vested rights." Therefore vested rights existing on June 25, 1954 the date of filing of Application 15929 cannot be invaded by the permittee without giving rise to a cause of action.

Note: This permit is issued subject to the following special clause: Permittee shall maintain in the natural stream channel of Whaler Creek at a point approximately 0.5 mile below point of diversion a minimum flow of 3 cubic feet per second, or shall by-pass the natural flow of the stream which ever is less, to maintain fish life.

Very truly yours,
STATE WATER RIGHTS BOARD
