June 17, 1952

Mr. Ervin H. Clausen
610 Rialto Building
San Francisco, California

Dear Mr. Clausen:

This is to acknowledge your letter of June 13, 1952, requesting that we mail you our proposed fish planting schedule for Wrights Lake, Pyramid Peak, Silver Range and Desolation Valley.

It is extremely difficult to give you this schedule at this time. As you perhaps already know, most of the lakes in the areas you mention are stocked with our airplane. Our schedule, therefore, is subject to constant change, for the reason that flying conditions are not always favorable, and it is at times necessary to postpone the work.

It now appears that our airplane for stocking in the vicinity of Wrights Lake will be operating from the Beckwourth Airport during the period July 14-20 and from the Minden Airport during the period July 29 to August 7.

If you wish to be advised when this work will get under way, it would be well for you to contact Mr. Allan Pollitt, Assistant Supervisor of Fish Hatcheries, Government Center, Placerville, who will be in direct contact with the airplane during the time planting in the area you mention is going on. I know he would be pleased to notify you as well in advance as possible when these areas will be stocked.

Yours very truly,

Earl Leitritz
Chief
Inland Fisheries Branch
