ALEXANDER J. CALHOUN

ROBERT MACKLIN, CENTRAL VALLEYS HATCHERY

ADDITIONAL BLACKFISH (ORTHODON MICROLEPEDOTUS) FOR EAST PARK RESERVOIR,
COLUSA COUNTY

Dear Bob:

Chet tells me you will soon have time to handle subject project.

Any time you can do it conveniently will be swell. The more you can transfer the better, although it should not be necessary to make more than one trip. The important thing is to be sure no other species gets mixed in with the blackfish.

As you probably know, we have obtained the approval of the Bureau of Reclamation, which controls the reservoir, and have already moved a small number of blackfish there from Clear Lake.

Sincerely,

ALEXANDER J. CALHOUN
District Fisheries Biologist
