Mr. Jerry Fiddler  
U.S. Bureau of Reclamation  
1140 West Wood Street  
Willows, CA 95988

Dear Mr. Fiddler:

Concerning your recent inquiry on the East Park Reservoir chemical treatment, a copy of our Environmental Analysis report is enclosed.

The lake was treated with rotenone on September 29 at the rate of about 1.0 gallon per acre-foot. Our plan now calls for restocking the lake with largemouth bass, channel catfish and other desirable species.

Thank you for your interest and cooperation in this project.

Sincerely,

Ron Rogers  
Assistant Fishery Biologist
