Dear Mr. Lassen:

On July 9 the Colusa Field Office of the USDA Soil Conservation Service distributed approximately one thousand fish (fingerlings) to 11 pond owners. The distribution took place between 10 a.m. and 12 p.m. at the Stonyford General Store, Stonyford California. (See attached)

The Project was again very successful and there was a lot of participation despite the fact that we did not receive county-wide coverage by the local newspaper.

Spawning this year appears to be late and numbers of fingerlings minimal but we had just enough to go around.

We recognize that this Project could not be easily realized without your helpful cooperation and I and the Board of Directors of the Stonyford Resource Conservation District thank you for your assistance.

Sincerely,

Chuck Bell
District Conservationist
Colusa F.O.
