To Fisheries Management

From Ron Hunerlach

Subject Inspection Trip Taken to upper Lettes Valley
Lake Colusa County

Sunday June 13, 1965 AN INSPECTION WAS
MADE AT upper Lettes Valley Lake.

Following The process of detoxification
this lake with potassium permanganate
a plant of 1,200 RTC was made. The
entire lake was circled with no observed
loss of fish.

A surface water temp. of 67° revealed
a 7° decrease from previous week. This could
be due to a release of water and wind action.

A total of 9 fisherman were contacted
which had fished a total of 17 hours
and caught 7 RTC
