

# Memorandum

To : Jim Ryan

Date: July 24, 1978

From : **Department of Fish and Game**

Subject: Letts Lake - Colusa County

Inspected subject lake July 20, 1978. Review of U.S.F.S. use data with the resident U.S.F.S. campground manager indicates heavy use in the spring and summer. Present catchable allotment is well used. Due to warm water, continue present policy of limiting plants to April-June period.

The lake once again has a climax population of golden shiners. Crayfish are also abundant.

Review with me a plan to chemically treat Letts Lake this fall.

Richard D. Beland  
Fisheries Management Supervisor  
Region 2
