Robt. Dasmann, Forest Supervisor  
U. S. Forest Service  
Mendocino National Forest  
Willows, California

Dear Bob:

Last year we talked of trying some experimental stocking of trout in the small lily pond near Letts Valley. My understanding of the matter was that the Forest Service had chemically treated the weeds to provide some space for the fish and that we would stock the fish this summer.

We will have some fish available probably in July and if the weeds are thinned out considerably from what they were, we can put a few hundred in to see how they fair.

Yours very truly,

D. W. Kelley  
Fisheries Biologist III

DNK/bw

Mr. D. W. Kelley, Fisheries Biologist  
California Department of Fish & Game  
1001 Jedsmith Drive  
Sacramento 19, California

Dear Mr. Kelley:

Mr. Dasmann has asked me to answer your letter of May 16.

We did poison the lily pond. There is some question as to how effective the job was. Ranger Dean Lloyd is going to take a look at it and then get in touch with you directly.

Sincerely yours,

ROBERT E. DASMANN, Forest Supervisor
