Dear Sir,

We are Camp Ground Hosts at Letts Lake Camp in Colusa Co. Would it be possible to make another Trout Fish Plant at Letts Lake by the Fish and Game?

This is a very popular little Lake for fishing and camping for a lot of people. On a popular day we will have up to 50 people fishing. The past plants have been depleted.

If you are able to make another plant, please have your driver go up through the locked Gate to dump the fish. The last plant was made by the boat ramp in shallow water. The fish were trapped by the moss and couldn't get out into deeper water.

Thank you for your help
Sincerely

Norval Martin
