

Memorandum

To : Inland Fisheries, Region I

Date: May 4, 1965

From : Department of Fish and Game, Region II, 1001 Jedsmith Drive, Sacramento 19.

Subject: Letts Valley Reservoir, Colusa County

As stated in management notes, do not plant this water with either the fingerlings or catchable trout until you clear with us. At this time we are considering chemical treatment in May of this year. If we treat, we expect the water to clear by June. We will keep you posted on plans. The lake teems with golden shiners.
