Dept. of Fish & Game.

Dear Sirs:

I, was wondering if you would be kind enough to tell me where I could find the dates that Stony Creek, or Creeks are planted, with catchable trout. I can find where various other creeks or streams are planted each week. But nothing on Stony Creek.

I am getting to a point where I cannot walk to far, and I would appreciate it if you give me the information I want.

Thanking you in advance, I remain,

Yours Very Truly

Dear Mr. Karcher:

We appreciate your concern about the dates that fish are to be planted in the Stony Creek area, and would like very much to give you specific information on the plants.

The planting of this area is conducted from the hatchery near Red Bluff and while it is under the supervision of this office, the plantings are accomplished when trucks and men are available. A planting is scheduled for the South Fork of Stony Creek this week. During the week of 6-14 to 6-20, both the big Stony Creek and Middle Fork will be planted. The exact dates cannot be determined at this time because of the conditions above. We find it impossible to publish exact dates and it is very undesirable to setup a planting program of any certain day of the week because of criticism to advance specific notice of our planting program.

We sincerely hope that you will be able to enjoy a successful fishing trip on these streams. We do not continue planting these streams after July 4 because of high water temperature conditions.

Very truly yours,

Allan F. Pollitt
