The Electric Power Research Institute (EPRI) is sponsoring a study of the State-of-the-Art in protecting migratory and resident fish at hydroelectric facilities. As part of this effort, the enclosed questionnaire(s) has been sent to you and other individuals across the United States and Canada requesting information on fish protection facilities.

You have been identified as the information source for the site(s) identified on the attached questionnaire(s). It would be greatly appreciated if you would complete the questionnaire(s) to the best of your ability and return it (them) in the enclosed, self-addressed stamped envelope (one questionnaire per envelope) at your earliest convenience, but not more than 10 days after receipt. If you do not have time to answer the questionnaires, please return it (them) anyway indicating same. If you feel that another individual is more qualified to answer the questionnaire(s), please pass it on or return it to us with that individual's name and address filled in where indicated. If fish protection systems were designed but not required or installed, please provide as much information as possible.

The questionnaire asks for references and other information on the design, operation, effectiveness and cost for fish protection facilities. If you have reports, technical papers, data, etc. which you can send, please do so under separate cover (the return envelope postage will only cover the cost of sending the 3-page questionnaire). Also, formal or informal non-disclosure arrangements can be made at the request of your organization.

We thank you in advance for your cooperation. Should you have any questions, please contact the individual noted at the end of the questionnaire or Mr. Charles Sullivan at EPRI [(415) 855-8948]. Again:

- ° Please return all questionnaires whether completed or not.
- ° Please send no more than one questionnaire per envelope (one envelope has been supplied for each questionnaire).
