CAPE MOHICAN SPILL UPDATE

SPILL: The amount originally reported by the facility has not been amended.

RESPONSE: There are crews involved in shoreline clean-up operations at Baker, China, and Ocean Beaches as well as Crissy Field. California Conservation Corps members have been deployed to Angel Island for shore clean-up of effective beaches

EQUIPMENT DEPLOYED TODAY:

10 vacuum trucks	1 open water skimming vessel
35 support vessels	8 shallow-water skimming vessels
22, 000 feet of boom	1 helicopter to direct skimming
2 boats to capture oiled wildlife.	530 people

SCAT: Spill Cleanup Assessment Teams (SCATs) continue to respond to reports of oiled beaches and wildlife in order to evaluate and verify reported information.

WILDLIFE: Species impacted include grebes, loons, gulls, brown pelicans, seals, and a turtle. 22 oiled birds are being cleaned, including 9 brown pelicans. 43 dead birds have been recovered. 13 oiled snowy plovers have been observed at Ocean Beach, DFG has been attempting to capture them. 12 oiled Harbor seals are continuing to be monitored.

Reports of oiled wildlife should be made to 510-841-9087.

BEACHES: All beaches controlled by the National Park Service remain closed except Ocean, Tennessee Valley, Muir, and Stinson.

JIC: The Joint Information Center (JIC) is open from 7am until 6:30pm daily.

CLAIMS: A hotline has been set up for third party claims @ 888-265-8381.

MAC: The next MAC meeting will be held at the Command Center on Monday @ 10:00.

VOLUNTEERS: Volunteers can be referred to 1-800-228-4544 for information.
